# Multi-Blockchain API: Wallet Transaction Example

```
const infinito = require('infinito');
```

```
// Init wallet on BTC or any other blockchain
```

```
var wallet = infinito.wallet.BTC.fromMnemonic('pass_phare');
```

```
// new traRegistersaction event
```

```
wallet.on('new-tx', (tx) => {
```

```
  // TODO: Transaction monitoring logic
```

```
});
```

```
// Register transaction confirmation event
```

```
wallet.on('tx-confirmed', (tx) => {
```

```
  // TODO: Transaction confirmation logic
```

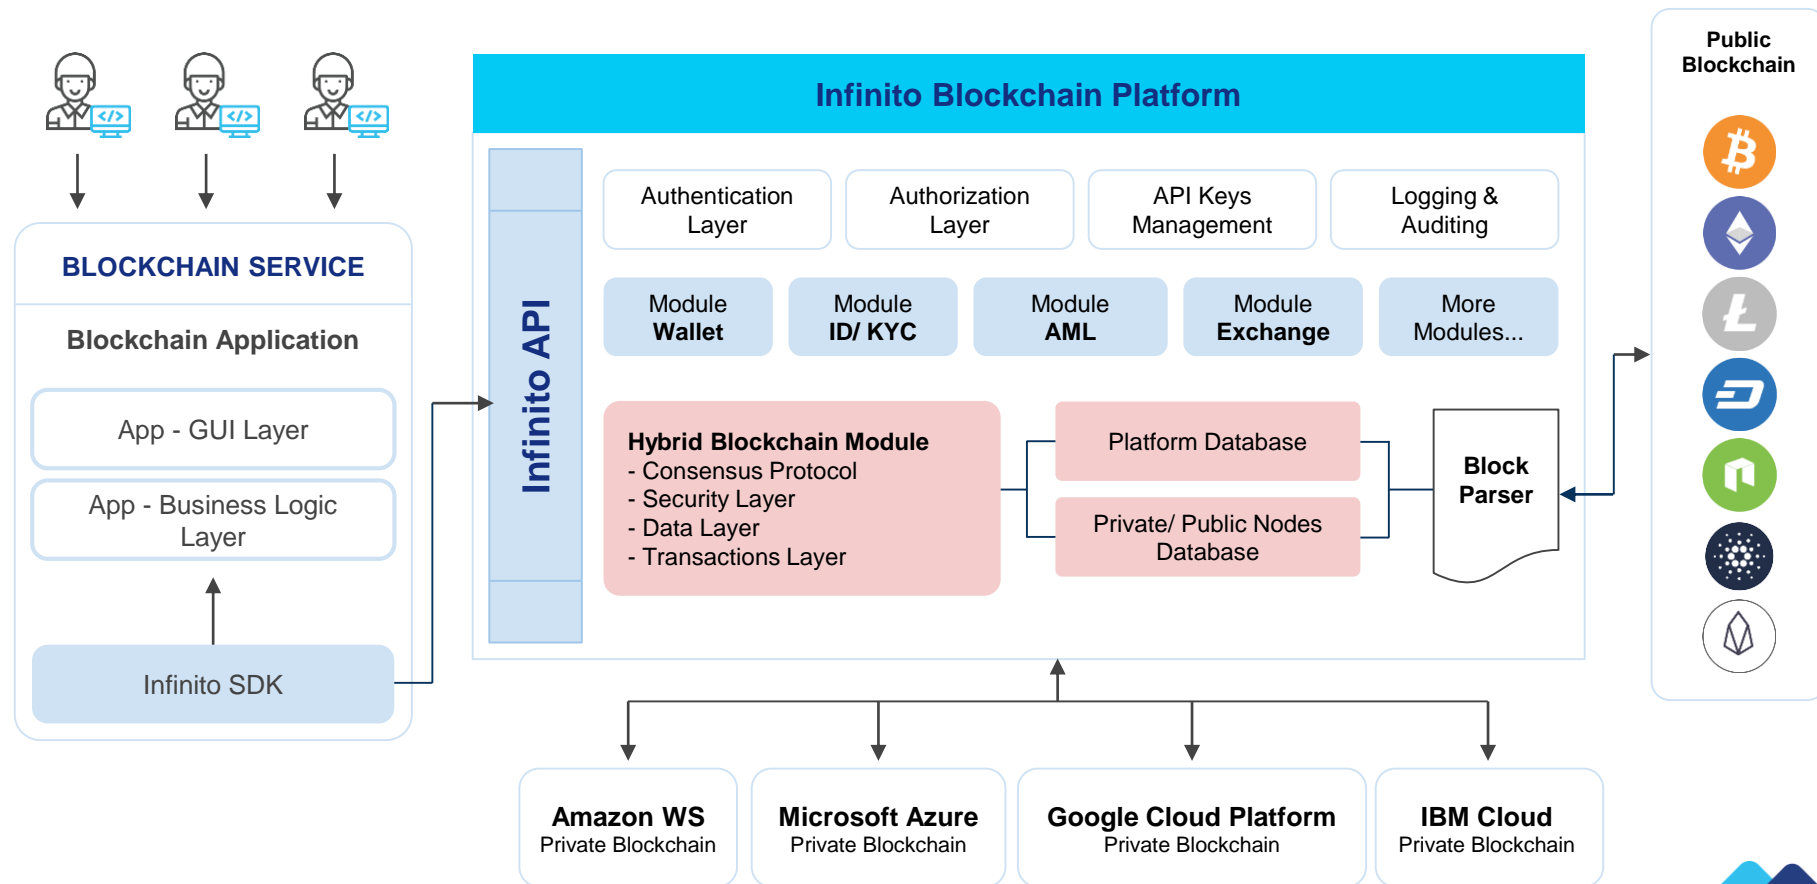

```
});
```

```
var recipient = "1Hz96kJKF2HLPGY15JWLB5m9qGNxvt8tHJ";
```

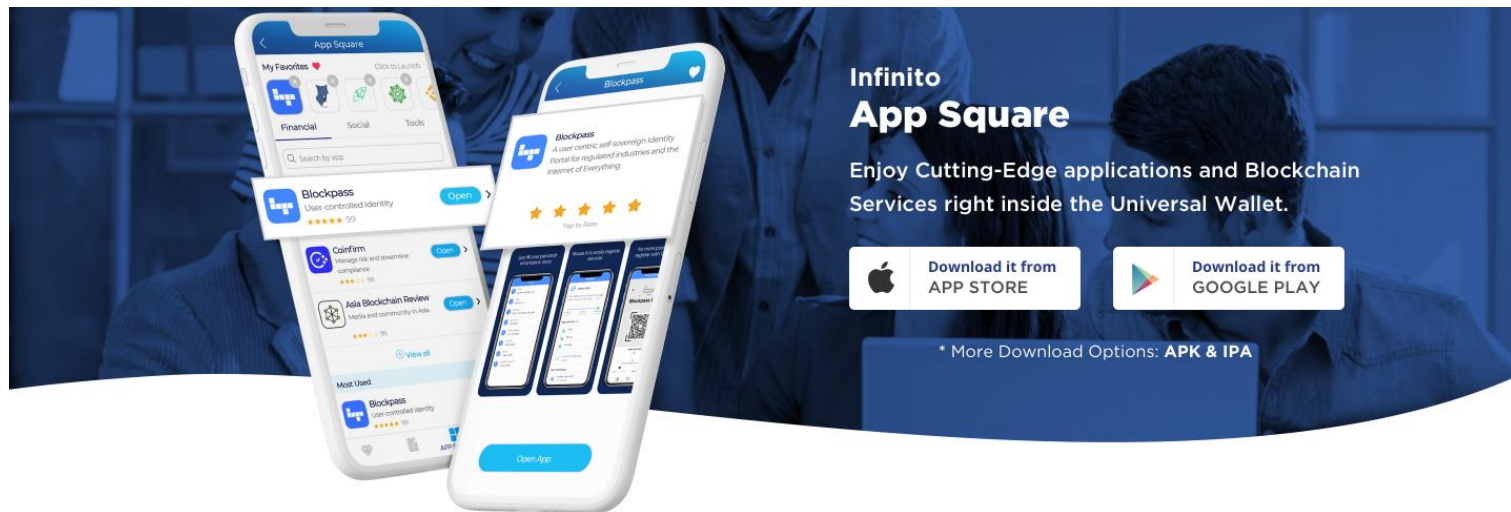

```
// Send 1 BTC to recipient
```

```
wallet.send(recipient, 1);
```

# Infito Blockchain Platform: High Level Technical Architecture

# Infinito App Square: Universal DApps store

## Infinito App Square

Enjoy Cutting-Edge applications and Blockchain Services right inside the Universal Wallet.

Download it from  
APP STORE

Download it from  
GOOGLE PLAY

\* More Download Options: **APK & IPA**

## WHERE EVERYONE CAN BENEFIT AND ENJOY

A built-in App store with innovative applications and services for end-users, developers or businesses.

For  
End-Users

For Developer  
Community

Do you want to  
build a dApp?

# Welcome to the future **Good Luck!**
